

How to add a fiber optic router for home use

Article Overview

To add a fiber optic router at home, you need an Optical Network Terminal (ONT) from your ISP, a compatible router with a Gigabit WAN port, and proper cabling to connect the ONT to your router.

Step 1: Gather Necessary Equipment

- **Optical Network Terminal (ONT):** This device converts the incoming fiber optic light signals into electrical signals that your router can use. It is typically provided and installed by your ISP .
- **Fiber-Ready Router:** Ensure your router has a Gigabit Ethernet WAN port and supports high-speed connections, ideally Wi-Fi 6 or 6E for optimal performance .
- **Fiber Optic Cable:** Usually single-mode with SC/APC or SC/UPC connectors, connecting the wall outlet to the ONT .
- **Ethernet Cable:** A Cat6a or higher cable to link the ONT to your router .

Step 2: Install the ONT

- Locate the fiber optic wall outlet where your ISP's fiber line enters your home.
- Connect the fiber optic cable from the wall outlet to the ONT's input port, handling the connector carefully to avoid dirt or damage .
- Power on the ONT and wait for the status lights to stabilize, which may take a few minutes .

Step 3: Connect the ONT to Your Router...
