

Is it normal for the router s fiber optic cable to emit a bright blue light

Overview

A constantly blinking blue light on your router can be a normal occurrence, depending on the context. POWER Normal: Solid/stagnant light. If OFF: The router is not powered — check the socket, adapter, or power cable. PON (Passive Optical Network) Normal: Solid. In some routers, a steady blue light might indicate a stable connection to the internet, while a blinking blue light could signify that data is being transmitted or received over the wireless network. For instance, some routers. This light shows whether your ONT is getting power. What to check: Make sure the power cable is securely plugged into both the ONT and a working wall outlet. There's a connection error and you'll need help.
