

Machine for twisting wires in distribution boxes

Article Overview

Wire twisting machines automate and standardize the process of twisting multiple wires, offering options from semi-automatic bench-top units to fully programmable industrial machines.

Types of Wire Twisting Machines

1. Semi-Automatic Bench-Top Machines

- Examples: bt 188 T, bt 288, JWD-TWG71
- Capabilities: Twist 2–4 wires, adjustable pitch, optional end fixing with tape, simple operation, suitable for small to medium production volumes .
- Advantages: Compact, cost-effective, easy to integrate into distribution box assembly lines.

2. Fully Automatic Industrial Machines

- Examples: Sigma 588, Sigma 688, WT200, WT300, WT400
- Capabilities: High-speed twisting (up to 5 m/s), multi-section twisting, programmable twisting direction and speed, automatic end fixing, integration with cutting, stripping, and crimping processes .

- Advantages: High throughput, consistent quality, suitable for large-scale production, supports complex wire configurations.
- #### 3. Dual-Head and Multi-Spindle Machines

- Examples: JCW-325B, Multi-spindle machines from Kingsing
- Capabilities: Twist multiple wire pairs simultaneously, adjustable speed and direction for each section, memory for multiple programs, advanced LCD control, sl...
