

Price of 304 Stainless Steel Cable Tray

Article Overview

304 stainless steel cable trays typically cost between \$10 and \$25 per meter, depending on type, size, and finish.

Price Overview

The cost of a 304 stainless steel cable tray varies based on tray type, dimensions, and supplier. For example:

- A 300mm wide, 3-meter long stainless steel cable basket tray (AISI 304) can be purchased from UK suppliers, with pricing generally reflecting its high corrosion resistance and suitability for industrial or commercial use .
- Smaller trays, such as 100mm x 30mm wire trays, are also available in 3-meter lengths, with prices in a similar range depending on supplier and specifications .
- Market analysis indicates that stainless steel trays are more expensive than galvanized steel, with prices ranging from \$2 to \$25 per meter, largely influenced by material grade, tray type (ladder, perforated, or wire mesh), and surface finish .

Factors Affecting Cost

- **Material Grade:** 304 stainless steel is corrosion-resistant and durable, making it more expensive than galvanized steel but less costly than 316 stainless steel.
- **Tray Type:** Ladder trays generally cost more than wire mesh trays due to higher material usage and load capacity. Wire mesh trays are lighter and more affordable.
- **Dimensions:** Width, depth, and length directly impact material usage and price. Wider or deeper trays cost more.
- **Surface Finish:** Passivated or polished finishes increase durability and price....
