

Price of high-altitude fiber optic cable laying equipment

Article Overview

High-altitude or aerial fiber optic cable laying equipment typically costs from \$800 to \$1,500 per day for rental, with purchase prices for specialized machinery ranging from \$10,000 to over \$50,000 depending on automation and capacity.

Equipment Costs

High-altitude fiber optic installation often requires specialized aerial deployment tools, such as tensioning devices, ADSS (All-Dielectric Self-Supporting) cable installation rigs, and pole attachment hardware. Rental costs for directional boring rigs or aerial cable installation equipment range from \$800 to \$1,500 per day, while trenching or general excavation equipment can cost \$200–\$500 per day plus operator fees . Purchase of fully automated fiber optic cable attachment machines can range from \$10,000 to \$50,000 or more, depending on features, certifications, and production capacity .

Installation Cost Context

The cost of laying fiber optic cable at high altitudes or aurally is influenced by terrain, cable type, and installation complexity. Self-supporting aerial cables typically cost \$3–\$7 per linear foot installed, while ADSS cables, which eliminate the need for messenger wires, require precise tensioning and specialized equipment . Additional hardware, such as pole attachments, can add \$50–\$150 per span. Labor costs vary by region and skill level, with crews charging \$75–\$180 per hour, and total labor ho...
