

South Sudan Industrial Distribution Box Specifications

Article Overview

Industrial distribution boxes in South Sudan typically feature 12-way electrical connections, IP67 protection, and dimensions of 300mm x 230mm x 290mm, suitable for harsh industrial environments.

Key Specifications

Electrical Connections: Most industrial distribution boxes in South Sudan are designed with 12 ways for electrical connections, allowing multiple circuits or devices to be connected simultaneously, providing flexibility for industrial setups and outdoor installations . **Protection Rating:** These boxes commonly have an IP67 rating, ensuring complete protection against dust ingress and temporary immersion in water. This makes them suitable for outdoor and industrial environments where exposure to moisture and dust is frequent . **Dimensions and Construction:** Standard dimensions are 300mm x 230mm x 290mm, and the enclosures are constructed from high-quality, durable materials resistant to corrosion and impact. This ensures long-term reliability in demanding industrial conditions . **Voltage Compatibility:** The boxes support a wide voltage range from 220V to 415V, accommodating both single-phase and three-phase power distribution systems commonly used in industrial and commercial applications . **Additional Features:**

- Some units include circuit breakers, surge protection, and ground fault protection for enhanced safety .
- Modular designs allow for flexible configuration, easy maintenance, and monitorin...
